

## TYPO3.Fluid - Bug # 8893

<b>Status:</b>	Resolved	<b>Priority:</b>	Must have
<b>Author:</b>	Bastian Waidelich	<b>Category:</b>	Core
<b>Created:</b>	2010-07-15	<b>Assigned To:</b>	Bastian Waidelich
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>Has patch:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	Negative numeric values are not correctly converted to FALSE		
<b>Description</b>			
<pre>&lt;f:if condition="-1"&gt;this should not be rendered&lt;/f:if&gt;</pre>			
actually renders the content, cause ViewHelperNode::convertToBoolean() does not correctly determine the type as /numeric/. Solution: move the is_numeric() check <b>above</b> the is_string() check.

### Associated revisions

#### Revision 8cb5a00c - 2010-07-15 19:18 - Bastian Waidelich

[!!!][+TASK] Fluid (ViewHelpers): The value argument is required again in form.checkbox and form.radio ViewHelpers. This is a breaking change, as the value argument has not been mandatory for a while. But it probably won't break existing templates as omitting the value makes no sense at all. Relates to #8852

[+FEATURE] Fluid (Core): implemented overrideArgument() method in AbstractViewHelper to be able to override previously registered arguments in subclasses. This resolves #8852

[+BUGFIX] Fluid (Core): Negative numeric values are properly converted to FALSE when used in boolean ViewHelper arguments. This resolves #8893

### History

#### #1 - 2010-07-15 19:18 - Bastian Waidelich

- Subject changed from *Negative numeric values are not correctly converted to booleans* to *Negative numeric values are not correctly converted to FALSE*

#### #2 - 2010-07-15 19:19 - Bastian Waidelich

- Status changed from *Accepted* to *Resolved*

- % Done changed from 0 to 100

Applied in changeset r4864.
