

TYPO3.Fluid - Bug # 8939

Status:	Rejected	Priority:	Should have
Author:	Xavier Perseguers	Category:	ViewHelpers
Created:	2010-07-19	Assigned To:	Bastian Waidelich
Updated:	2010-10-20	Due date:	
Has patch:			
Affected Flow version:			
Subject:	format.date does not handle TYPO3/UNIX timestamps		
Description			
Hi,			
I just upgraded an Extbase extensions I developed for TYPO3 4.3 and came across a bug in the format.date ViewHelper. My dates are not displayed anymore as the conversion from unix timestamp to DateTime object is invalid (constructor expects a string representation, not a timestamp).			
Enclosed is a patch that solves this issue.			

History

#1 - 2010-07-19 18:16 - Bastian Waidelich

- Status changed from New to Rejected
- Assigned To set to Bastian Waidelich
- % Done changed from 80 to 0
- Branch set to v4 + v5

Hi Xavier,

as you have seen, the format.date ViewHelper internally passes the date argument to the DateTime constructor.

The DateTime constructor accepts Unix timestamps too, but according to

According to <http://www.php.net/manual/en/datetime.formats.php> -> Compound Formats they have to be prefixed with "@".

See <http://lists.typo3.org/pipermail/typo3-project-typo3v4mvc/2010-July/005751.html> for more information and feel free to re-open this issue if you don't agree or want to discuss this further.
