TYPO3.Flow - Bug # 9

Status:	Closed	**Priority:**	Should have
Author:	Robert Lemke	**Category:**	Reflection
Created:	2007-02-19	**Assigned To:**	Robert Lemke
Updated:	2010-10-20	**Due date:**	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	AOP Framework doesn't work at all - invalid type "...BasicClass_AOPProxy"		
Description			

The T3P_Core_AOPFramework_Tests fail all and the FileCache/.../AOPProxy directory contains no files.

PHP Version: 5.1.6
OS: Gentoo Linux

History

#1 - 2007-02-19 17:23 - Robert Lemke

- Status changed from New to Accepted

The problem occurs in the T3P_Reflection_Class and can be exposed as follows:

In T3P_CoreAOPFramweork->buildAspectsFromComponents() add the following lines after the *$class = new T3P_Reflection_Class* statement:

    $secondClass = new Reflection_Class($componentConfiguration->getClassName());
    echo ($secondClass->getDocComment());

The expected result is the doc comment of all component classes, however in this case no comment is shown. This might be a bug in PHP 5.1.6 although we didn't find a bug report in the PHP bug tracker.

#2 - 2007-02-19 17:52 - Robert Lemke

- Status changed from Accepted to Closed

- Sprint set to fixed

(In r129) * Fixed a little error in index.php
    - Added a PHP version check to the TYPO3 class, now requires at least PHP version 5.2.0. Fixes #9.

#3 - 2007-02-19 17:53 - Robert Lemke

Upgrading to PHP 5.2.0 solved the problem.
