Updated:	2011-12-15	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Support for currencies		

Description

Currencies should probably be handled in a special way in FLOW3. Maybe there should be a Currency class which would store the decimal value and the international currency code?

This would provide a nice way to store and display money amounts.

Karol, could you handle this?

#2 - 2010-10-11 12:58 - Karsten Dambekalns

When dealing with decimals, never use decimals :) Store integers only, i.e. multiply by 100 for common cent-based currencies. This helps to avoid rounding errors, have a look at Robert's moneylib extension for some inspiration...
