<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	Make the resource argument name for REST controllers configurable		
<b>Description</b>			
<p>The (not yet fully functional) RestController automatically selects the appropriate action depending on the request type (GET, PUT, DELETE etc.) and if a resource was specified. By now the controller assumes that the resource for show() etc. is specified by an argument called "id". This is, however, old-fashioned, not really DDD compliant and unflexible.</p> <p>Let's make "resource" the default argument name and allow developers to specify a differing name if necessary.</p>			

### Associated revisions

#### Revision cf53c63b - 2010-08-23 16:31 - Robert Lemke

[~TASK][!!!] FLOW3 (MVC): Renamed the RESTController to RestController.

[+FEATURE] FLOW3 (MVC): The name of the request argument triggering the actions show(), delete() and update is now configurable through the RestController's property "resourceArgumentName". Default name is "resource". Resolves #9327
