Subject:	Dynamic Scaffolding broken		

Description

Since the creation of dynamic scaffolding Fluid has changed internally. Therefore the injection of dynamically created templates does not work anymore and an exception is thrown as the template file is not found. I changed the ScaffoldingView to reflect these changes in Fluid and it works again. A patch is attached.

Can you find out which revision of fluid introduced the breaking change? I'll write a patch that will make the kickstarter compatible with all fluid versions then.

I think that r2409 is responsible for the braking change, as the function TemplateView::getTemplateSource() was introduced in this revision:
