

TYPO3.Flow - Feature # 9534

Status:	Rejected	Priority:	Could have
Author:	Julian Kleinhans	Category:	Persistence
Created:	2010-08-31	Assigned To:	
Updated:	2011-10-13	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Subject:	RAND as order possibility		
Description			
It would be cool to have a possibility to get randomize data.. for example			
<pre>\$query = \$this->createQuery(); return \$query->matching(\$query->equals('X', \$x)) ->setOrderings(array('date' => \F3\FLOW3\Persistence\QueryInterface::ORDER_RAND)) ->setLimit(\$limit) ->execute();</pre>			
or			
<pre>\$query = \$this->createQuery(); return \$query->matching(\$query->equals('X', \$x)) ->randomizeResult() ->setLimit(\$limit) ->execute();</pre>			
actually you cant randomize BEVORE the query executes, so you cant set a limit, must select all results and randomize per plain php code..			

History

#1 - 2010-08-31 15:55 - Karsten Dambekalns

- Priority changed from *Should have* to *Could have*
- Target version deleted (*1.0 alpha 12*)
- Start date deleted (*2010-08-31*)

#2 - 2011-04-29 21:51 - Karsten Dambekalns

Implementation hint at <http://www.petefreitag.com/item/466.cfm>
