

TYPO3.Flow - Feature # 9968

Status:	New	Priority:	Should have
Author:	Andreas Förthner	Category:	Security
Created:	2010-09-28	Assigned To:	Andreas Förthner
Updated:	2013-12-09	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Subject:	Promote security publishing configuration automatically when persisting models		
Description			
<p>When we persist a model that holds a file, we should be able to configure its needed publishing configuration in the policy. The can be done on the basis of securit resource, as shown in the following example:</p>			
<pre>SecurityPublishingConfiguration: F3_Blog_Domain_Model_Post_HiddenPosts: fileProperty: image publishingConfiguration: roles: [Editor, Administrator] expireDate: 2h</pre>			
<p>This would add a publishing configuration with roles and an expire date to all file objects that are attached to posts that match the F3_Blog_Domain_Model_Post_HiddenPosts security resource (entity resource identifier).</p>

There is a problem, if a resource object is used (published) before it is persisted. Maybe we should skip this feature?
