

Core - Bug # 14422

Status:	Closed	Priority:	Should have
Author:	old_kttxpo	Category:	Install Tool
Created:	2004-11-30	Assigned To:	Michael Stucki
Updated:	2006-08-12	Due date:	
TYPO3 Version:	3.7.0		
PHP Version:			
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	bug with MySQL 4.1.7		
Description	<p>all SQL statements like NOT NULL DEFAULT '0' seem to be rejected by mysqld</p> <p>There has already been some fixes for ext. installation, but if you use the install tool to upgrade from 3.6 to 3.7 for example, you cannot import the static tables, and you cannot apply the comparison's results as well.</p> <p>Well.. if it has already been fixed up, I'll blush and cry sorry. (issue imported from #M560)</p>

History

#1 - 2004-12-03 15:27 - old_kttxpo

looks like # 0000546, because of the new syntax on auto increment.

#2 - 2004-12-03 15:57 - old_kttxpo

something like this should be able to correct it.

```
#!/bin/bash
version=typo3_src-3.7.0
for i in $(find $version -name *.sql)
do
    echo "Patching $i..."
    sed -r "s/DEFAULT '0' NOT NULL auto_increment/NOT NULL auto_increment/g" -i $i
    grep "DEFAULT '0' NOT NULL auto_increment" $i
done
for i in $(find content/typo3conf -name *.sql)
do
    echo "Patching $i..."
    sed -r "s/DEFAULT '0' NOT NULL auto_increment/NOT NULL auto_increment/g" -i $i
    grep "DEFAULT '0' NOT NULL auto_increment" $i
done
```
