Subject:	Warning: mysql_fetch_assoc() error		
Description	<p>After finishing configuration of this installation, I tried to access the front- and backend; both cause this issue. I cannot login or do anything. The backend shows login prompt, frontend is totally unusable.</p> <p>Warning: mysql_fetch_assoc(): supplied argument is not a valid MySQL result resource in /home/drekowski/public_html/t3/typo3_src-3.8.0/t3lib/class.t3lib_db.php on line 741</p> <p>Ubuntu/Linux 5.04 Mysql 4.1.10a-Debian_2ubuntu0.1-log PHP 5.0.4-0.6.hoary.1 (issue imported from #M1305)</p>

History

#1 - 2005-07-25 13:48 - David Rekowski

1 step)

I switched debug on and tried to execute the following SQL-query with phpmyadmin:

```
"SELECT *
FROM be_sessions,be_users
WHERE
be_sessions.ses_id = '13b59139a3c23914331f9cb8ededbdfc'
AND be_sessions.ses_name = 'be_typo_user'
AND be_sessions.ses_userid = be_users.uid
AND (
be_sessions.ses_iplock='127.0.0.1'
OR be_sessions.ses_iplock='[DISABLED]'
)
AND be_sessions.ses_hashlock=185765706
AND be_users.pid=0 AND be_users.disable=0 AND be_users.deleted=0 AND (be_users.starttime<=1122292039) AND (be_users.endtime=0 OR
be_users.endtime>1122292039)"
```

It complains about missing column ses_iplock:

```
#14715 - Unknown column 'be_sessions.ses_iplock' in 'where clause'
```

2 step)

I tried dumping tables.sql to the db via mysql typo3 < tables.sql, which caused
ERROR 1067 (42000) at line 12: Invalid default value for 'uid'

this line reads:

```
uid int(11) unsigned DEFAULT '0' NOT NULL auto_increment,
```

what is wrong here?

#2 - 2005-08-16 18:26 - Michael Scharkow

This looks suspiciously similar to #0000416, please look at this first and see if it solves your problem.

#3 - 2005-09-02 15:34 - David Rekowski

Right, it seems to be a duplicate of #14354. I'm sorry for that, I did search the bug database before though.
