Updated:	2010-05-11	Due date:	
TYPO3 Version:	4.2		
PHP Version:	5.2		
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	Cannot log in to backend		
Description	<p>A few months ago we upgraded to Typo3 version 4.2 and everything was okay. Last week we upgraded our MySQL server from 5.0 to 5.1 and now I cannot log in to the backend. I was able to log in with MySQL 5.0 and Typo3 4.2.</p> <p>Also, the website displays properly so it is accessing the database for that at least.</p> <p>(issue imported from #M9203)</p>

History

#1 - 2008-10-23 14:20 - Rob Vonk

Do you have more than one BE user? None works?

Can you create a new Admin user from the install tool?

#2 - 2008-10-23 14:28 - Rob Vonk

Or could it be that it's duplicate of this?

#3 - 2009-07-14 17:54 - Brian Lamb

We were able to solve this by adding the following the to localconf.php file:

```
$TYPO3_CONF_VARS['SYS']['setDBinit'] = 'SET SESSION sql_mode=MYSQL40;'.chr(10).'SET NAMES utf8;';
```

#4 - 2010-05-11 12:36 - Chris topher

Setting sql-mode=MYSQL4 solves this problem. You can do so in the my.ini of mysql or in the TYPO3 Install Tool using

```
$TYPO3_CONF_VARS['SYS']['setDBinit'].
```

Resolved as duplicate of #15295.
